PERSONAL PROJECTS

CGPA-Calculator (03/2024 - Present)

- I achieved developing a user friendly and intuitive website that calculate Students GP for each semester. This application helps student keep track of their academic performance.

Database Management (05/2024)

- Using SQL, I manage and manipulate data by querying them. Using Postgresql for the database to store data. I use SQL to make a query to the database to fetch, push or update data.

ACHIEVEMENTS

Increased Team Productivity (09/2022)

I was able to increase the team productivity of the JCPC Media by 30% within 3 months, by developing a website that helps people download books that they needed and view information relating to the organization.

Capstone Project in school (06/2024)

I was able to complete and defend a capstone project that was given to me in school. The project was to create an even website that had the following pages: Home, Register, Schedule, Venue, and About.
